INTERIOR WRAPS & GRAPHICS

Modern Lift Interiors Without Replacement

IRELAND'S FIRST DEDICATED SERVICE FOR LIFT AND ELEVATOR INTERIOR WRAPPING.

Who are we ?

CoreWrap is Ireland's first dedicated service specialising in the transformation of lift and elevator interiors using architectural vinyl.

We provide a smart, cost-effective alternative to full lift refurbishment by resurfacing existing interiors with durable, design-led finishes — delivering a complete visual upgrade without disruption.

Our Solution

Precision Interior Wrapping

CoreWrap applies high-performance architectural vinyl directly to lift walls and panels, transforming the interior appearance while keeping all existing infrastructure in place.

Installations are fast, clean, and minimally invasive — typically completed within hours rather than weeks.

The Challenge

Many buildings are held back by tired, dated lift interiors that no longer reflect the quality of the property itself.

Traditional refurbishment is expensive, time-consuming, and disruptive for residents and occupants — often requiring shutdowns, removals, and unnecessary waste.

Key Benefits

- ✓ Cost-effective alternative to full replacement
- ✓ Minimal downtime and disruption
- ✓ Durable, easy-to-maintain surfaces
- ✓ Clean installation with no structural works
- ✓ Immediate visual improvement for residents and visitors

A smarter way to modernise lift interiors — without the cost, waste, or disruption of traditional refurbishment.

INTERIOR WRAPS & GRAPHICS

Who can benefit from lift wrapping?

Lift wrapping is suitable for any building with shared or passenger lifts. Design choices and finishes vary depending on the environment, usage levels, and overall objectives of the building.

Residential Developments

A clean, modern lift interior improves first impressions for residents and visitors alike. Lift wrapping offers a cost-effective way for OMCs and property managers to upgrade common areas.

Commercial & Office Buildings

Lift interiors can reflect a professional, well-maintained environment using neutral, architectural finishes that align with the building's overall design.

Student Accommodation

Durable, easy-to-clean finishes are ideal for high-traffic environments, helping maintain standards while reducing long-term maintenance costs.

Hospitality & Hotels

Lift interiors can be upgraded to complement the wider interior design scheme, creating a more cohesive and considered guest experience.

Healthcare & Wellbeing Facilities

Clean, calm finishes can improve the feel of internal spaces while remaining practical and compliant for regular cleaning..

Transport & Public Buildings

Lift wrapping can be used to modernise heavily used lifts while keeping downtime to an absolute minimum.
